Accredited to ISO/IEC 17065:2012

Effective Date September 10, 2025

Products and Process Category	Certification Scheme and Scheme Owner / Standard
Building Components	TUV Austria Romania
Hydro-Thermal Insulation	Scheme Type 5 and Type 6 (ETICS Process) TUV Austria Romania Building Material Certification Process QPS-TAR-CMC-010
Concrete	Scheme Type 5 TUV Austria Romania Building Material Certification Process QPS-TAR-CMC-010
Road Concrete	Scheme Type 5 TUV Austria Romania Building Material Certification Process QPS-TAR-CMC-010
Road Works	Scheme Type 4 TUV Austria Romania Building Material Certification Process QPS-TAR-CMC-010
Cold-Worked Ribbed Wire	Scheme Type 5 TUV Austria Romania Building Material Certification Process QPS-TAR-CMC-010

Notes:

1. The product certification used most closely resembles a product certification scheme type as described in ISO/IEC 17067 (2013), *Conformity assessment — Fundamentals of product certification and guidelines for product certification schemes*.

SCOPE OF ACCREDITATION

International Accreditation Service, Inc.

3060 Saturn Street, Suite 101, Brea, California 92821, U.S.A. | www.iasonline.org

- a. **Type 4:** *The surveillance part of this scheme allows for the choice between periodically taking samples of the product from the point of production, or from the market, or from both, and subjecting them to determination activities to check that items produced subsequent to the initial attestation fulfil the specified requirements. The surveillance includes periodic assessment of the production process.*

This scheme can both indicate the impact of the distribution channel on conformity and provide a premarket mechanism to identify and resolve serious nonconformities. Significant duplication of effort may take place for those products whose conformity is not affected during the distribution process.

SCOPE OF ACCREDITATION

International Accreditation Service, Inc.

3060 Saturn Street, Suite 101, Brea, California 92821, U.S.A. | www.iasonline.org

- b. **Type 5:** *The surveillance part of this scheme allows for the choice between periodically taking samples of the product either from the point of production, or from the market, or from both, and subjecting them to determination activities to check that items produced subsequent to the initial attestation fulfill the specified requirements. The surveillance includes periodic assessment of the production process, or audit of the management system, or both. The extent to which the four surveillance activities are conducted may be varied for a given situation, as defined in the scheme. If the surveillance includes audit of the management system, an initial audit of the management system will be needed.*
- c. **Type 6:** *This scheme is mainly applicable to certification of services and processes.*

Although services are considered as being generally intangible, the determination activities are not limited to the evaluation of intangible elements (e.g. effectiveness of an organization's procedures, delays and responsiveness of the management). In some situations, the tangible elements of a service can support the evidence of conformity indicated by the assessment of processes, resources and controls involved. For example, inspection of the cleanliness of vehicles for the quality of public transportation.

As far as processes are concerned, the situation is very similar. For example, the determination activities for welding processes can include testing and inspection of samples of the resultant welds, if applicable.

For both services and processes, the surveillance part of this scheme should include periodic audits of the management system and periodic assessment of the service or process.
